available in five different versions:

- type aero
- type flow
- type cone
- type ip
- type strait

innovations

- including screw cover
- including mounting hardware for almost all handlesbars from 12mm to 22mm inside diameter
- optional handlebar extension about 15-30mm

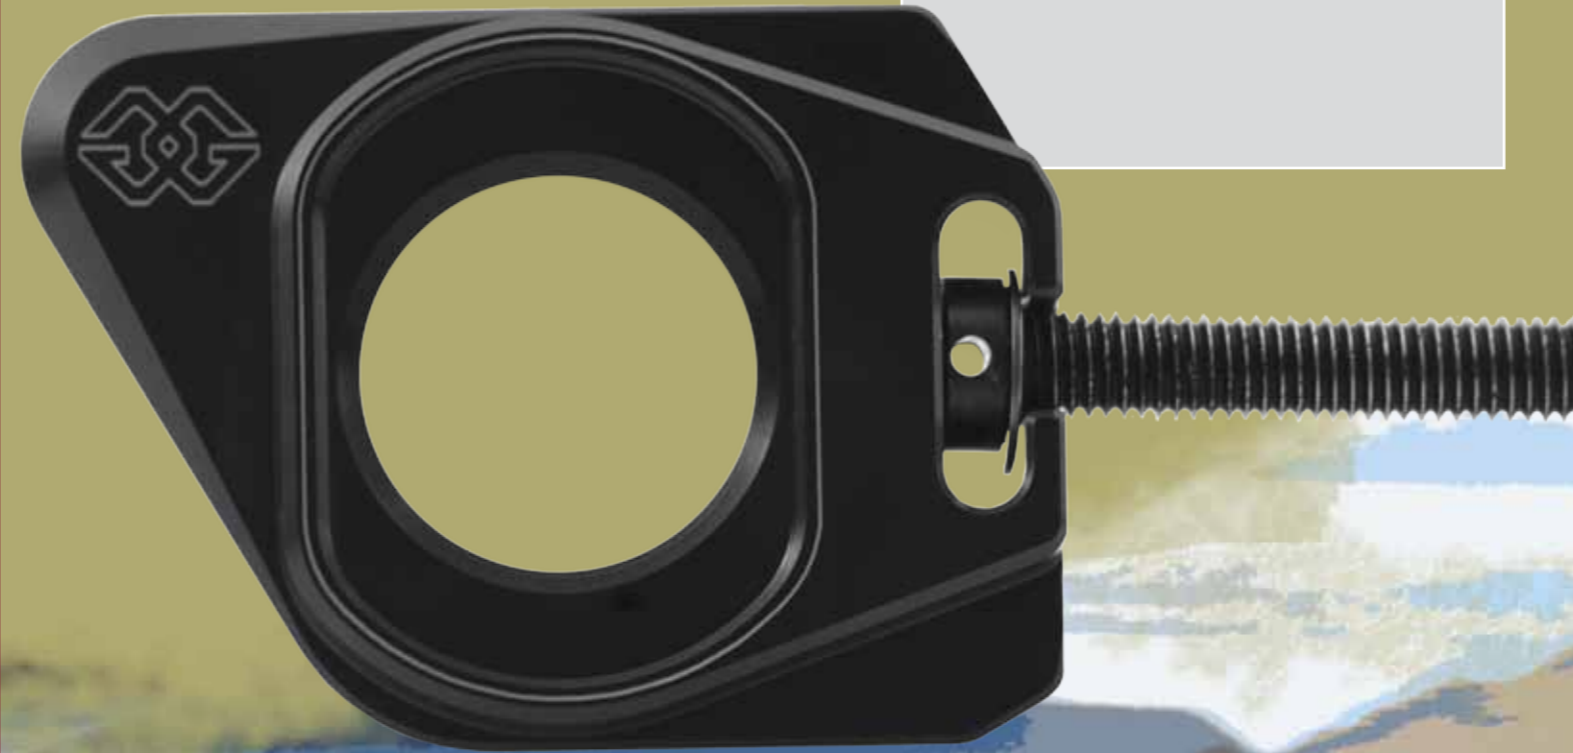

type ip

innovations

- high-precision chain adjustment
- special bolt enables axle adjustment in both directions
- precise positioning by graded-scale
- by applying the scale you can compensate serial tolerances
- axb stay in the swing arm while rear wheel installation
- braces the axle against compressive- and tensile load

features

- brilliant gilles.tooling design
- easier rear wheel installation
- unique, innovative axle block
- available in different precious hard anodized colors

rgk2 + extension + factory-racing-peg

rgk2 option: extension

rct12.gt-peg with 2 profiles in one
